TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), HTML, CSS

Frameworks & Libraries: Next.js, React, Node.js, LangChain

AI & Cloud Technologies: Generative AI, Google Gemini API, Retrieval-Augmented Generation (RAG), Vector Databases (Pinecone), Firebase (Firestore/Realtime Database)

Developer Tools & Platforms: Git, GitHub, Vercel, Stripe API, Clerk (User Authentication)

TECHNICAL PROJECTS

AI Interview Prep Assistant (<https://github.com/SufiyanRauf/AI-Interview-Prep-Assistant>) | July 2025 - Aug 2025 ·

Deployed on Vercel

- Built a Next.js chatbot for technical-interview practice that streams answers token-by-token from the Gemini API
- Added a RAG layer (LangChain + Pinecone) to embed a knowledge base and retrieve the top 3 matches per query
- Routed coding questions to a larger Gemini model and general chat to a cheaper one to control cost

SparkCards: AI Flashcard SaaS (<https://github.com/SufiyanRauf/Flashcard-SaaS-Project>) | July 2025 - Aug 2025 ·

Deployed on Vercel

- Built a flashcard SaaS in Next.js that turns pasted notes into a 10-card deck via the Gemini API
- Prompt the model for strict JSON and parse it defensively so malformed output does not break the UI
- Wired Clerk for auth, Firestore for per-user decks, and Stripe Checkout for the \$5/mo Pro plan

Multimodal AI Pantry & Recipe Generator (<https://github.com/SufiyanRauf/Pantry-Tracker-Project>) | July 2025 - Aug 2025 · Deployed on Vercel

- Built a pantry tracker (Next.js + Firestore) where users add items by typing or by photo
- Used Gemini's vision model to identify the food item in an uploaded photo and log it automatically
- Generate recipe ideas on demand by sending the current pantry list to Gemini and rendering the JSON response

EDUCATION

California State University, Fullerton | Expected Graduation: Fall 2028

M.S. in Computer Science — Conditionally Admitted (Foundational Pathway)

Completing foundational CS prerequisite coursework; begin core graduate curriculum Spring 2027.

CodePath — Technical Training | Completed August 2025

Completed intensive programs in Technical Interview Preparation (data structures, algorithms, problem-solving) and Introduction to Cybersecurity.

California State University, Long Beach | Graduated December 2020

Major: Bachelor of Science in General Biology | Honors: Magna Cum Laude, President's Honor List

EXPERIENCE

Kaiser Permanente, Anaheim, CA | **COPE Health Scholar** | Nov 2020- Feb 2022

- Partnered with a multi-disciplinary team of nurses, physicians, and specialists to achieve optimal patient outcomes through clear and constant communication.
- Demonstrated rapid adaptability by rotating through multiple hospital units, mastering new team dynamics and complex protocols every 90 days.

CSULB, Long Beach, CA | **Undergraduate Research Assistant** | Aug 2017 - Dec 2020

- Methodically debugged and refined multi-step experimental protocols, isolating variables to resolve issues and ensure the consistency and reproducibility of results.
- Managed concurrent, long-term research projects, applying a data-driven approach to problem-solving from hypothesis to conclusion.
